PROFESSIONAL SUMMARY

Product manager specializing in AI-powered content platforms and data-driven product development. 6 years PM experience building products that scale globally, leading cross-functional teams, and driving measurable business impact. I combine hands-on Python/JS development with product strategy to ship features that improve activation, reduce churn, and drive multimillion-dollar revenue impact. Recently, I led AI content initiatives that lifted conversion by over 3% and added \$6M+ in annualized revenue, while reducing post-release issues by 40%.

SKILLS

- Product Leadership & Strategy: Roadmapping, product vision, discovery, stakeholder management, cross-functional team leadership, P&L ownership, executive communication.
- Data & Experimentation: A/B testing, cohort analysis, funnel optimization, KPI design, SQL, Python (Pandas, scikit-learn), statistical analysis, dashboard development.
- International Product Management: Led products across 15+ languages and 35+ global markets; managed bilingual teams; launched culturally-specific implementations for English, French, German, Spanish, Italian, Portuguese markets.
- AI & Platform Products: AI/ML product development, prompt engineering, multi-LLM evaluation (OpenAI, Anthropic, Gemini), API product management, platform architecture, JSON schema design.
- Technical Product Skills: API design, system architecture, Python/JavaScript for prototyping, React, MongoDB, prompt templating systems, evaluation frameworks.

Product Manager II, Global Content, 04/2024 - Current**BOLD**

- Own AI content platform serving 35-40 resume/cover letter portals across 15+ languages: 8 production API products (Work History, Skills, Summary, Cover Letter content delivery; Enhancement APIs; Resume/CL Personalization; Job Title Recommender) generating \$10M+ annual revenue with 92% of team's monthly impact.
- Lead shared cross-functional team of 14-15 (engineers, data scientists, content specialists, UX) as primary stakeholder; present product strategy and performance biweekly to CPO and product leadership. Built prompt engineering capability within content team through hands-on training and framework development.
- Designed prompt architecture framework enabling live variable-based generation and JSON output structures for production APIs; pioneered migration from static content generation to dynamic, API-driven personalization. Created 18-month product vision and maintain autonomous roadmap (60% strategic initiatives, 40% cross-portal partnerships).
- Launched resume-to-job-ad tailoring API and job title recommender from 0-to-1; established multi-provider LLM evaluation process (OpenAI, Anthropic, Gemini) and prompt library reused across platform. Make independent decisions on LLM provider selection, technical architecture, and feature prioritization.
- Grew platform revenue 2.5x from \$4M to \$10M+ annually; achieved >3% average conversion lift across experiments, 40% year-over-year reduction in post-release defects through systematic UAT processes. Track portfolio metrics including content add rate, adds per user, time on page, and engagement across culturally-specific implementations.

Product Manager, Data Programs, 04/2021 - 02/2024**TripleTen (formerly Yandex.Practicum)**

- Owned strategy and roadmap for Data Science and Data Analyst bootcamp programs, leading 25-person cross-functional team (content, engineering, student support) serving 1,000+ students annually across English and Russian markets.
- Reduced drop/refund rate quarter-over-quarter through data-driven interventions: redesigned onboarding experience, implemented early-warning triggers via cohort analysis, and improved pacing based on student feedback loops. Increased program completion rates and lifted NPS by 1.5 points.
- Launched capstone project redesign and automated project feedback tooling; built internal analytics dashboards and student progress tracking systems. Collaborated with data science team to develop predictive models for student success.
- Managed program P&L and revenue targets; presented quarterly business reviews to executive leadership. Balanced student experience optimization with business metrics (retention, completion, satisfaction).

- Pioneered video creation initiative, building team and process to produce 5-minute animated educational videos distilling complex technical concepts, improving student learning outcomes

Data Programs Content Lead, 12/2020 - 04/2021

TripleTen

- Built and managed a 15-person content team; owned English-language style guides, knowledge base, and video/design materials for data programs.
- Created tools and processes for proactive content monitoring, enabling faster curriculum iteration.

Lead English Instructor, 08/2015 - 12/2020

Moscow Lyceum Stupeni – Moscow, Russia

- Designed English curricula for grades 2-11; achieved 100% student pass rate on Cambridge/IELTS/TOEFL exams through systematic curriculum development and individual progress tracking.
- Built automated systems for debate tournament tabulation, digital teaching materials database, and student performance tracking. Led weekly theater program and annual debate competitions.

English Instructor, 08/2012 - 07/2015

The American Home – Vladimir, Russia

- Designed and delivered lessons from beginner to advanced levels; organized weekly cultural events and lectures.
- Authored and edited course books and built an automated grade and homework tracking system for 100+ students.

EDUCATION

Bachelor of Arts: Psychology & Russian Language and Culture, 2012

Vanderbilt University - Nashville, TN

- Research: Memory structures in patients with schizophrenia (published work).
- Extracurriculars: Tutoring (physics, calculus, Russian); developed and led a science lab program for students with disabilities; assistant manager of building operations at the Commons Center; various campus activities.
- GPA: 3.65 / 4.0
