PROFESSIONAL SUMMARY

Senior-level Product Manager with 6 years of experience delivering AI-powered platforms at global scale. Own a 20-API content platform generating \$10M+ annual revenue across 35+ portals and 15+ languages, leading a cross-functional team of 15. Most recently led the AI generation workstream for a ground-up redesign of resume upload & apply experiences on Monster and Zety, shipping 12 net-new AI-first APIs ahead of schedule. Track record of 2.5x revenue growth, >3% average conversion lift, and 40% reduction in post-release defects. Hands-on with Python/JS, prompt architecture, and multi-LLM evaluation (OpenAI, Anthropic, Gemini).

SKILLS

Generative AI Product Development | Multi-LLM Evaluation & Model Selection | Prompt Engineering | API Product Management | Platform Architecture | Product Strategy & Roadmapping | 0-to-1 Product Development | A/B Testing & Experimentation | Data Analysis | Python | SQL | JavaScript (React) | Agile Delivery (Jira) | Stakeholder & Executive Communication | Cross-Functional Leadership

EXPERIENCE

- Product Manager, AI Content Platform | BOLD**

Apr 2024 – Present

 - Own AI content platform: 20 production APIs serving 35-40 global portals across 15+ languages, generating \$10M+ annual revenue (92% of team's monthly impact).
 - Led AI generation workstream for a ground-up redesign of resume upload & apply flows on Monster and Zety — architected and delivered 12 net-new AI-first APIs ahead of schedule, coordinating backend, front-end, design, and content teams.
 - Directed platform-wide foundation model migration through structured multi-provider evaluation (OpenAI, Anthropic, Gemini); standardized prompt architecture and reusable prompt library across all teams.
 - Lead cross-functional team of 15 (engineering, data science, content, UX); present product strategy biweekly to CPO. Instituted structured Jira tracking across two teams and train content team in prompt engineering.
 - Launch products from 0-to-1 (resume-to-job-ad tailoring API, job title recommender); drive migration from static content databases to dynamic, API-driven generation. Maintain 18-month product vision and autonomous roadmap.
 - Grow platform revenue 2.5x (\$4M to \$10M+); achieve >3% average conversion lift; reduce post-release defects 40% YoY.
- Product Manager, Data Programs | TripleTen (formerly Yandex.Practicum)**

Apr 2021 – Feb 2024

 - Led strategy and roadmap for Data Science and Data Analyst bootcamp programs, heading 25-person cross-functional team serving 1,000+ students annually across English and Russian markets.
 - Reduced drop/refund rate quarter-over-quarter through data-driven interventions: redesigned onboarding, implemented early-warning triggers via cohort analysis, and improved pacing from student feedback loops. Lifted NPS 1.5 points.
 - Launched capstone redesign, automated feedback tooling, and educational video initiative; created analytics dashboards and predictive models for student success. Managed program P&L; presented quarterly business reviews to executive leadership.
- Data Programs Content Lead | TripleTen**

Dec 2020 – Apr 2021

Built and managed 15-person content team; oversaw English-language style guides, knowledge base, and content monitoring processes for data programs.
- English Language Instructor → Lead Instructor | Moscow, Russia**

Aug 2012 – Dec 2020

Taught English from beginner to advanced levels across two schools; progressed to Lead Instructor designing curricula for grades 2–11 with 100% student pass rate on Cambridge/IELTS/TOEFL exams. Developed automated systems for student tracking, grading, and debate tournament operations.

EDUCATION & LANGUAGES

Bachelor of Arts: Psychology & Russian Language and Culture | Vanderbilt University | 2012
English (Native) **Russian** (Full Professional Proficiency)
